The diagram shows a 3x3 grid. The central square is empty. The four squares immediately surrounding the center (top, bottom, left, and right) each contain a black arrow pointing towards the center square. The top and bottom squares have arrows pointing downwards and upwards respectively, while the left and right squares have arrows pointing inwards.

## ENTRE EM CONTATO

The diagram consists of two main groups of rectangles. On the left, there is a 2x2 grid of rectangles. Each rectangle in this grid has a black outline and a white fill. Below this grid is a single, wider rectangle, also with a black outline and white fill. To the right of this grid is a vertical stack of four rectangles, each with a black outline and white fill. The rectangles in the stack are of varying widths and heights, but all are oriented horizontally.
